Python datatypes

- int
- float
- bool
- complex
- string

```
4 #int without variable
```

```
4
```

```
10
```

```
10
```

```
4 + 10
```

```
14
```

```
_
```

```
14
```

```
_ + 5
```

```
19
```

```
_ + 2
```

```
21
```

```
_ - 3
```

```
18
```

```
i = 5 #int with variable
i
```

```
5
```

```
id(i)
```

```
11654504
```

```
type(i)
```

```
int
```

float

```
petrol_price = 110.45
petrol_price
```

```
110.45
```

```
gold_price = 11000.56
gold_price
```

```
11000.56
```

```
f2 = 2e0
f2
```

```
2.0
```

```
type(f2)
```

```
float
```

```
f3 = 2.5e2
f3
```

```
250.0
```

```
f4 = 3.4E3
f4
```

```
3400.0
```

BOOLEAN (BOOL)

```
True
```

```
True
```

```
False
```

```
False
```

```
None
```

```
print(True + True)
print(True + False)
print(True - True)
print(False - False)
```

```
2
1
0
0
```

```
10/2 #float division
```

```
5.0
```

```
10//2
```

```
5
```

```
False/True
```

```
0.0
```

```
False//True
```

```
0
```

```
True/False
```

```
---------------------------------------------------------------------------
ZeroDivisionError                         Traceback (most recent call last)
/tmp/ipykernel_2710/2794436645.py in <cell line: 0>()
----> 1 True/False

ZeroDivisionError: division by zero
```

Next steps: Explain error

complex

```
c = 10 + 20j
c
```

```
(10+20j)
```

```
type(c)
```

```
complex
```

```
d = 20 + 30j
```

```
d
```

```
(20+30j)
```

```
print(c)
print(d)
```

```
(10+20j)
(20+30j)
```

```
print(type(i))
```

```
<class 'int'>
```

```
type(c)
```

```
complex
```

```
c
```

```
(10+20j)
```

```
c.real
```

```
10.0
```

```
c.imag
```

```
20.0
```

String

```
welcome
```

```
---------------------------------------------------------------------------
NameError                                 Traceback (most recent call last)
/tmp/ipykernel_2710/1243561387.py in <cell line: 0>()
----> 1 welcome

NameError: name 'welcome' is not defined
```

Next steps: Explain error

```
welcome = 7
welcome
```

```
7
```

```
nit = 7
nit
```

```
7
```

```
'Welcome to my World of creations'
```

```
'Welcome to my World of creations'
```

```
"Welcome to my World of creations"
```

```
'Welcome to my World of creations'
```

```
'''Welcome to my World of creations'''
```

```
'Welcome to my World of creations'
```

```
'''Welcome
to
my
World
of
creations'''
```

```
'Welcome \nto \nmy \nWorld \nof \ncreations'
```
