```
import matplotlib.pyplot as plt
import seaborn as sns
```

In [53]:
```
%matplotlib inline
plt.rcParams['figure.figsize'] = 6,2
```

In [54]:
```
import warnings
warnings.filterwarnings('ignore')
```

In [55]:
```
df['InternetUsers']
```

Out[55]:
```
0      78.9
1       5.9
2      19.1
3      57.2
4      88.0
       ...
190    20.0
191    46.5
192     2.2
193    15.4
194    18.5
Name: InternetUsers, Length: 195, dtype: float64
```

In [56]:
```
vis1 = sns.distplot(df["InternetUsers"])
```

In [57]:
```
# if given displot instead of distplot the line graph was missing
vis1 = sns.displot(df["InternetUsers"])
```

- If plt was given instead of sns it will through an error (attribute error)
